## Technical Data

### How IŞIK Acoustic Flexible Panel Prevents Sound Transmission ?

30 mm narrow wooden strips,  
hard materials will reflect sound  
not reflective  
It is placed on a 7 mm polyester panel .

The polyester on the floor absorbs the sound,  
improves the acoustics in the room .

600 X 2800 mm

## DEFINITION

SOUND ISOLATION PANEL FOR WALL – ACOUSTIC PANEL

We love the Scandinavian interior style and raw look created by LIGHT wood.

That's why we've developed our sound-absorbing wall panels that fit this style perfectly.

Acoustic panels have the same advantages as our other acoustic panels that help increase room acoustics in your home.

Our sound absorbing panels for the wall are available in many different colors, so you can find the one that best suits your style.

The colors are perfect for a stylish and modern look.

The sky is the limit when it comes to interior design and with our new acoustic panels you can pick and choose however you like.

## Easy Operation

*Oval Usage Feature !*  
*Portable Use!*

# Acoustic FLEXIBLE PANEL

## Installation Instruction

ACOUSTIC FLEXIBLE (FLEXIBLE) PANEL,  
30 mm mdf rigid laths are placed on a 7 mm polyester panel that reflects the sound much less than hard materials.  
is placed.

IStylish Inc. In this product, which he designed and produced, he adopted the Scandinavian style and adopted the sound absorbing style suitable for this design style.  
developed the wall panels. Acoustic panels will help balance the acoustics in your spaces.

Our sound absorbing panels for your walls are presented to you with different color pattern options.

Brand new IŞIK ACOUSTIC with stylish and modern designs and colors that add value to spaces
